**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 31-41 are rejected under 35 U.S.C. 102 (e) as being anticipated by Barbut et al. (U.S. 5,769,816).

With respect to claims 31 and 37, Barbut et al disclose in figure 1, a surgical device for capturing emboli includes an elongate member (50) having a proximal end and a distal end. A flexible emboli capturing device (10), the distal end of the capturing device mounts proximate the distal end of the elongate member (50). The distal end of the elongate member extends distally of the emboli capturing device, where the emboli capturing device includes a filter portion (40) or the filter portion includes a conical portion (as best seen in fig. 1) that extends proximally from the distal end of the emboli capturing device, and where the hoop-shaped wire frame (30) disposed on the mouth of the flexible emboli capturing device.

With respect to claims 32-33 and 38, Barbut et al disclose in fig. 1, the frame (30) slideably disposes about the elongate member, and where the frame is attached to the elongated member proximal of where the flexible member is attached.

Art Unit: 3731

With respect to claims 34-36 and 39-41, Barbut et al disclose the frame (30) includes a flexible material and a shape memory characteristic (col. 8, lines 9-15). Moreover, the frame includes a continuous loop (figs 1 and 4).

***Response to Arguments***

2. Applicant's arguments with respect to claims 31 and 37 have been considered but are moot in view of the new ground(s) of rejection. Applicant is asked to please refer to the modified prior art rejection above wherein examiner addresses applicant's concerns regarding prior art rejections.

***Conclusion***

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
